I know—super cool! I love the built-in record-keeping!

Granted, we used to use a much, MUCH better Web CMS in Region 8. It was called Merant (and later Serena Collage). You could find (in just a few seconds) ***exactly*** who did what and when to every single type of asset on the entire website. It was incredibly user-friendly and idiot-proof. ☺

Versions in Drupal will help too.

Hi everyone!

One of our Regional Counsel attorneys came by a little while ago and asked me if I would be able to produce a record (JUST in case he or I or anyone else is ever asked) of every change that Jeff or I has made to the GKM website. It's a great question, and it fortunately has a great answer!

Every time I publish a new version of any page on the website, I write EXACTLY what I did (literally every letter or sentence or data file—every change I made, including what was ***previously*** on that page whenever needed for clarity). Jeff is undoubtedly doing the very

same thing; he's every bit as meticulous about this stuff!

Thus, we have a FULL record of every modification to every page, image, document, link and other file on the website, even if it's literally one single comma (which is what I just notated on my most recent change to the August 17, 2015 "data" page).

Let me know if you have any questions about this.

Thanks,

Tim
